

WORK EXPERIENCE

Small Planet - Mobile Developer

October 2015-April 2016

Worked as an Intern at Small Planet during my last year of school. During my time there I helped build apps on IOS, Android and Unity. Working at SP was an incredible experience where I learnt a lot about shipping software ready for users and companies. <http://smallplanet.com>

- Spot On: Build using Swift 2.0 and Java for the Android version currently on the app store
- Princess Celebrate: built on Swift 2.0 for the Iphone; helped built some of the new added princesses
- Turbo by Fanduel: built on Unity using C# no release day at the moment

Skitic - Frontend developer

January 2015-September 2015

Working as part of the initial team with a backend developer, created a fully customized HTML and CSS web-site using Bootstrap and LESS variables. Applied PHP for databases calls and helped build an extensive databases for 100 ski stations. Website went be live In November 2015, since then it has had its designed changed. <http://skitic.com>

Youlep - Web Developer

2014

Created a WordPress template for the website using HTML, CSS and PHP. Adapted a language translation plugin using JS to work for the site. <http://youlep.com>

Co-Founder of magnetiKmania magnet shop

2010 -2013

magnetiKmania.com is the on-line store for original magnets. Created a project and business from the ground, learned PHP and databases as well as PR and advertisement. <http://magnetikmania.com>

Co-Founder and editor of LooksFeelsWorks.com

2010 -2013

Online blog about industrial design that published daily and maintained social networks. Used Wordpress as back-end and created a customized HTML template for it. <http://looksfeelsworks.com>
